

MANIFESTO

Low impact

Strive for better design processes, for a better future.

We, as designers, find ourselves in the crossroads between creative thought and consumerism, where the environment and human life are disregarded in the face of monetary profits. We choose to stand up to injustice and design responsibly, taking care that our actions don't have a negative impact.

Low waste

Aim for zero-waste, every day, every moment.

We allow ourselves to learn and grow more conscious. We take into consideration the materials we use, their origins, impact and versatility. We choose to repurpose and re-use, mend and cherish our possessions and dispose of what needs to be in the most conscious and thoughtful manner. If something doesn't fit you, it fits someone else.

Longevity

Wear your values proudly, wear your clothes until the seams fall off.

Mend them, patch them, hand them down. We cannot go on consuming endlessly. We create quality designs that will last a lifetime.

Community

Come together as a force for good. Design and help each other become better.

We are stronger together, giving each other the tools and opportunities to be the best we can. We create spaces where creativity and consciousness can thrive.
